PROFESSIONAL EXPERIENCE

Technical Lead | Experion Technologies *Aug 2021 – Present*

- Lead full stack development of xPort, a port management platform, building Laravel APIs and React/TypeScript frontends.
- Re-architected xPort from .NET and AngularJS to a Laravel API and React/TypeScript frontend, introducing Dockerized environments and Redis caching.
- Automated the release process with Docker-based Jenkins CI/CD pipelines, replacing manual releases with automated dev and QA deployments, Jira-tracked releases, and standardized GitHub release and naming conventions.
- Optimized PostgreSQL and MySQL queries and Redis caching strategies, improving API response times and system reliability.
- Stabilized the Laravel and Angular platform for Flexible Drive, an Australian OEM and aftermarket auto parts supplier, by eliminating redundant API calls, cleaning up and

restructuring inconsistent API data, and introducing client-side localStorage caching with time-based expiry where none existed.
- Modernized a legacy client application by upgrading Laravel to the latest version and its AngularJS frontend to the latest stable release, keeping it secure and supportable.
- Integrated Adobe Analytics and Adobe Target for A/B testing and user behavior tracking, and built dashboards and Excel reports that guided data-driven product decisions for client stakeholders.
- Act as primary technical contact for clients, on-site in Suriname and remotely, translating business requirements into technical designs across the project lifecycle.
- Mentor junior developers, lead code reviews, and run sprint planning in Agile/Scrum.

PHP Developer | Qaptive Technologies *Mar 2019 – Mar 2021*

- Owned the Laravel backend for Loqqat (school bus tracking) as sole backend developer and built the backend for Loqqat Ride (employee commute platform), delivering real-time tracking for schools and enterprises with JavaScript and Bootstrap frontends.
- Developed RESTful APIs consumed by the Android and iOS apps, working closely with both mobile teams, and integrated GPS data with the Google Maps APIs for real-time vehicle tracking.
- Designed and optimized MySQL schemas for high-frequency location and tracking data.
- Developed custom Magento modules and third-party integrations for e-commerce clients.

Web Developer | Ridgecone Technologies *Feb 2018 – Jan 2019*

- Built custom WordPress themes and plugins, including PHP and MySQL backend features.
- Managed CMS migrations and third-party integrations.

PHP Developer | BC to AD Hyperlink Ltd *Jan 2017 – Feb 2018*

- Developed PHP backend modules from business requirements and contributed to technical documentation.
- Supported testing, deployment, and post-release maintenance.
